SEAMLESS SOLUTIONS FOR GLAZING NEEDS

Login Page

Register Page

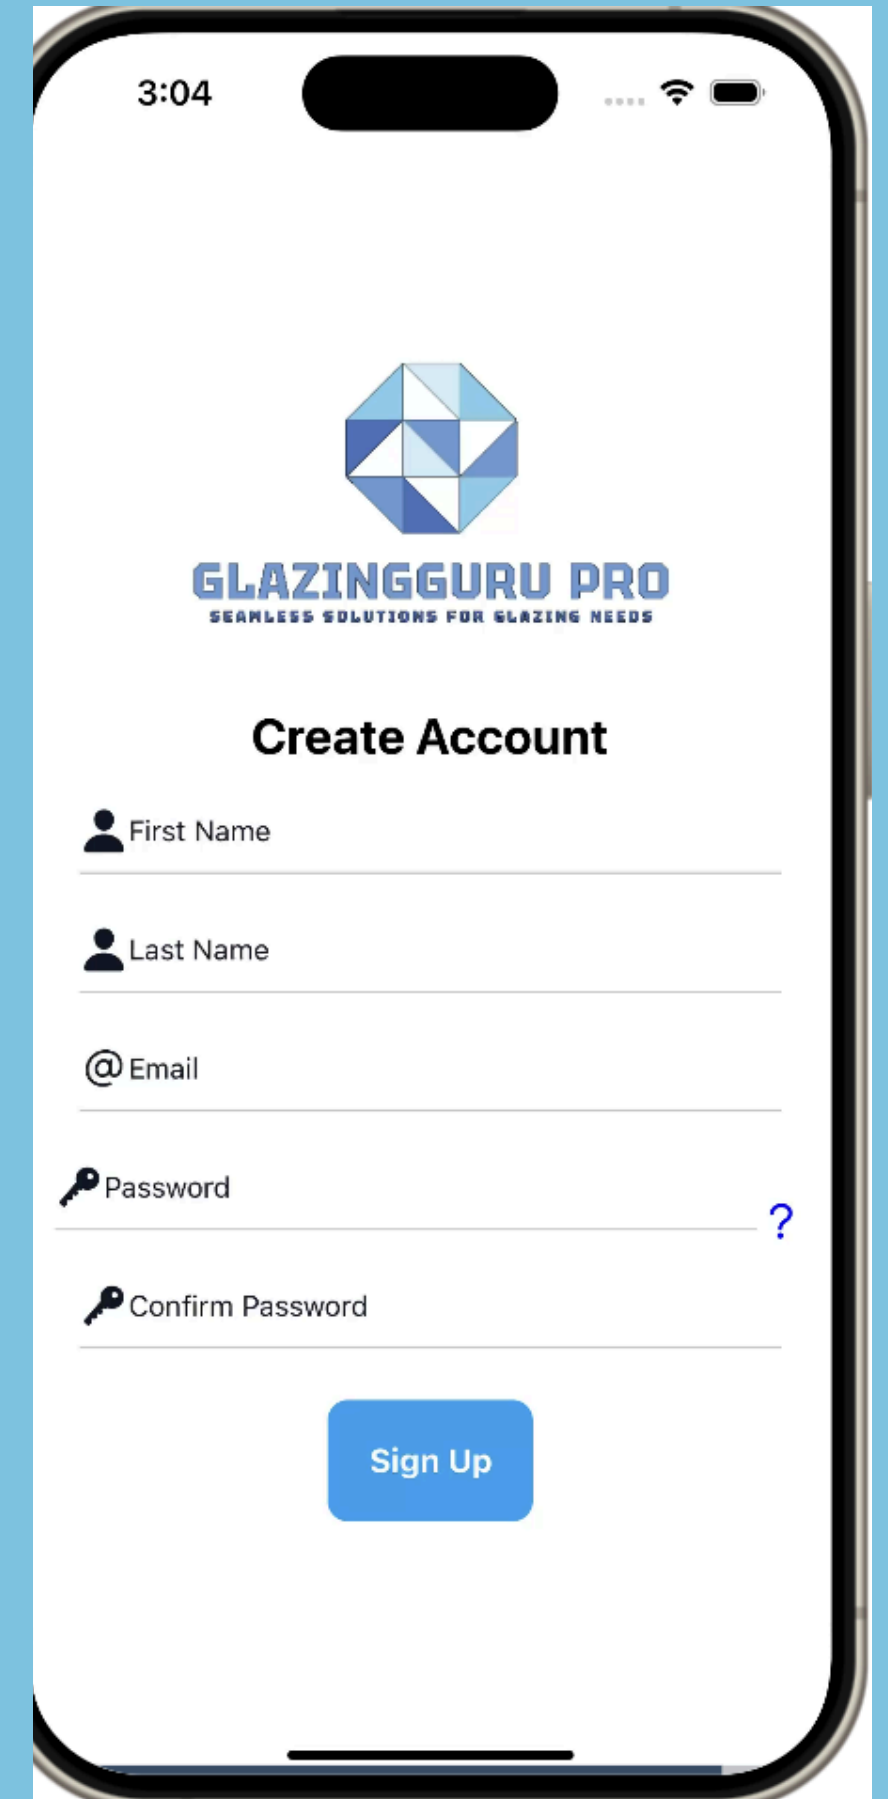

Whether you're a returning user or joining us for the first time, our login and registration page serves as your portal to seamless access and boundless opportunities.

- Login Page: Welcome back! Enter your glazing universe with a single click. Our login page offers effortless access to your account, where every project, detail, and collaboration awaits. Simply input your credentials to access all your glazing information.

- Register Page: New? We're excited to welcome you aboard! The registration page is your entryway to joining. Register easily and commence your journey towards creating stunning projects. For assistance in creating a strong password, click the '?' icon to view our password guidelines and ensure the security of your account.

Projects Page

Welcome to our main landing page, your gateway to every project crafted within our app. Immerse yourself in a seamless browsing experience as you effortlessly scroll through a curated collection of projects. Each project is an interactive touchpoint, beckoning you to delve deeper into its details on the dedicated project page.

Looking for a specific project? Our intuitive search bar empowers you to swiftly locate projects based on customer names, ensuring you find what you need with ease.

Ready to embark on a new project journey? Simply tap the plus button in the bottom right corner to seamlessly transition to the new project page.
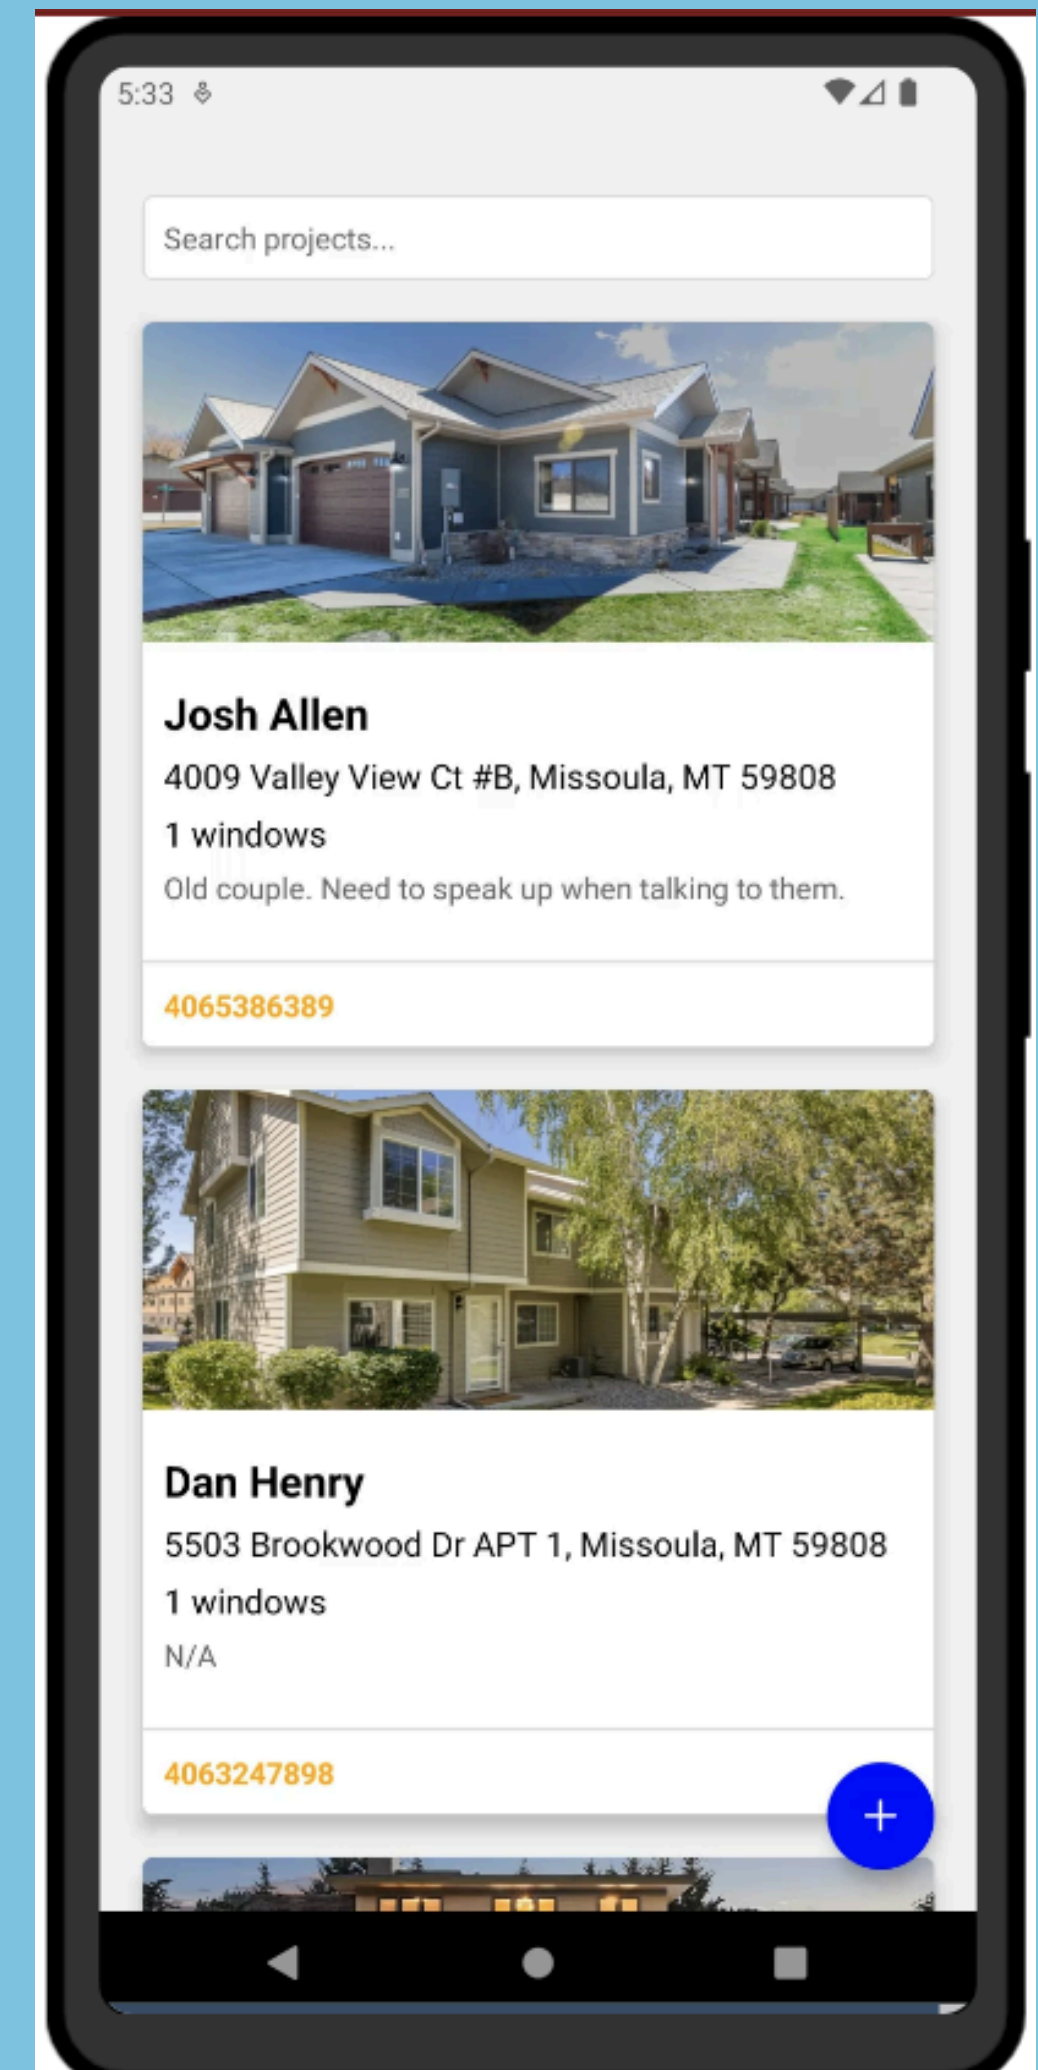

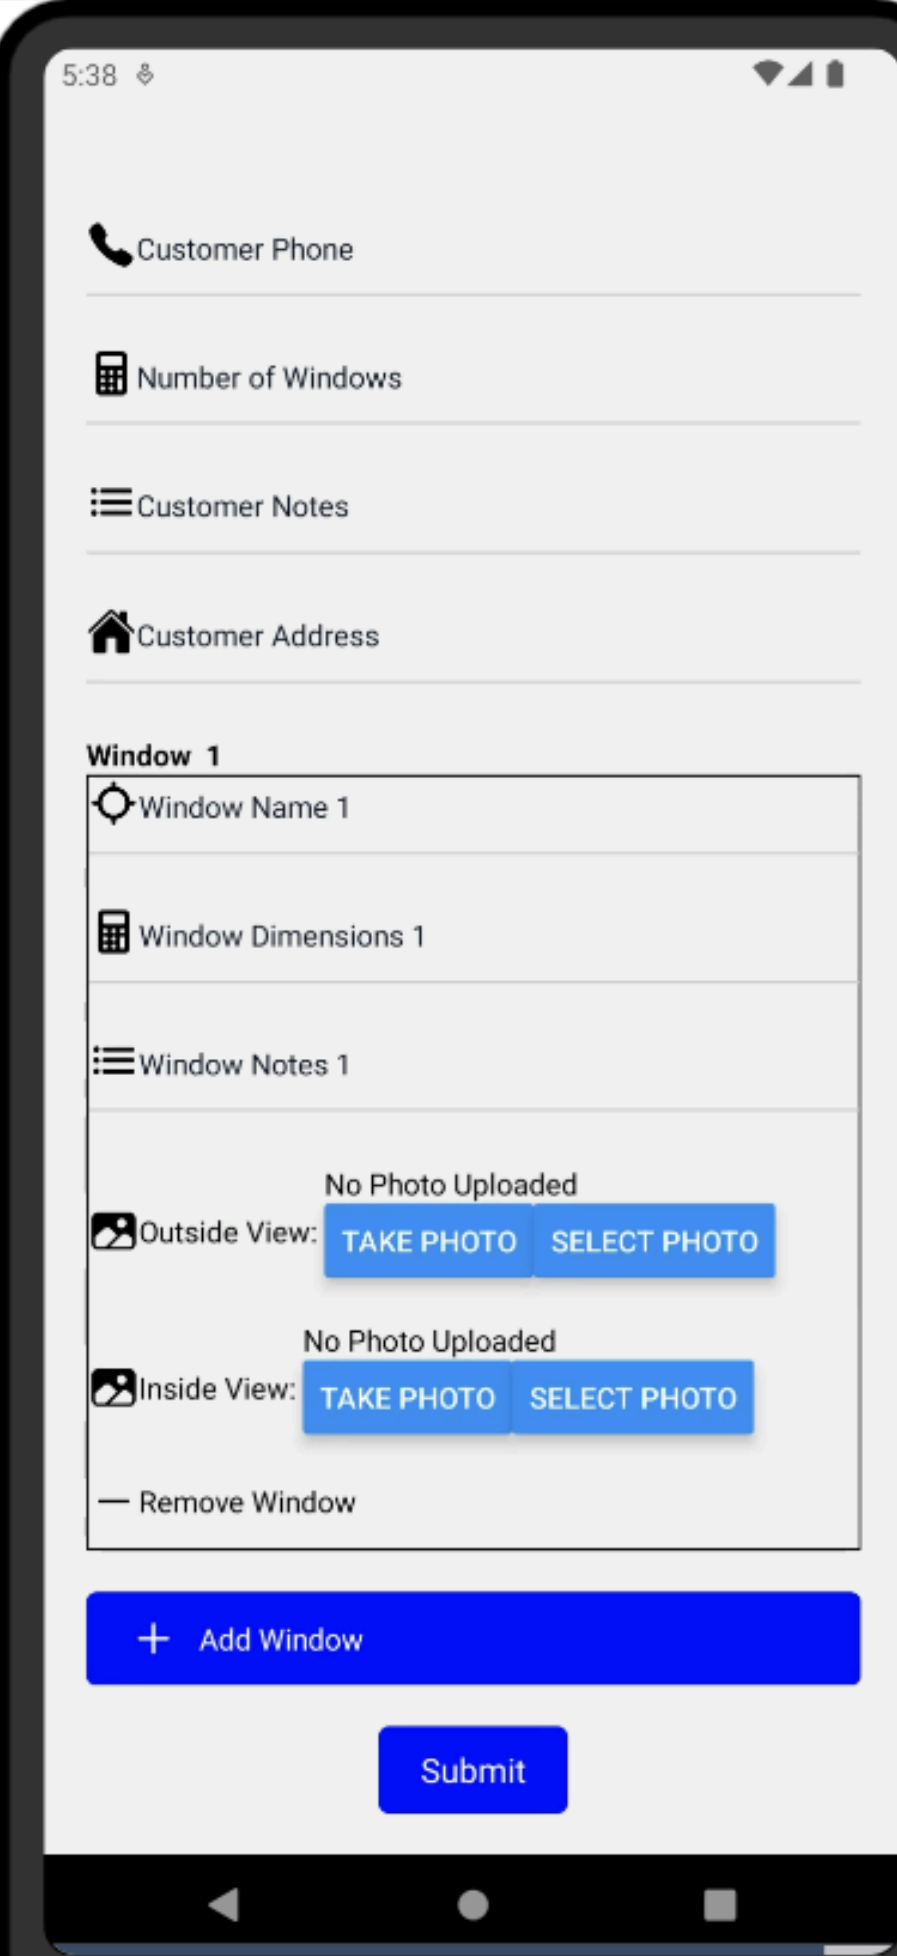

New Project Page

Welcome to the New Project page, your command center for efficient project management in the glazing industry. Here, you can input vital project details such as customer information, house photos, window specifications, and any relevant notes.

Easily document the customer's name, contact details, and address to streamline communication and ensure seamless project execution. Specify the number of windows and provide essential details for each, including dimensions, notes, and accompanying photos for reference.

Need to add more windows or details? Simply click the 'Add Window' button to expand your project scope. Once all information is entered, hit the 'Submit' button to finalize your project and find it promptly accessible on the Projects page for continued management and tracking.

Project Page

Welcome to the Project Page, your central hub for comprehensive project details. Upon selecting a project from the Projects page, you're seamlessly transported here, where every aspect of your selected project is meticulously documented and easily accessible.

Scroll effortlessly to explore all pertinent project information, from customer details and house photos to window specifications and notes. Dive deep into the intricacies of the project, ensuring nothing is overlooked and all details are at your fingertips.

With intuitive navigation and comprehensive data presentation, the Project Page empowers you to efficiently manage and track your projects, ensuring smooth operations and delighted customers.
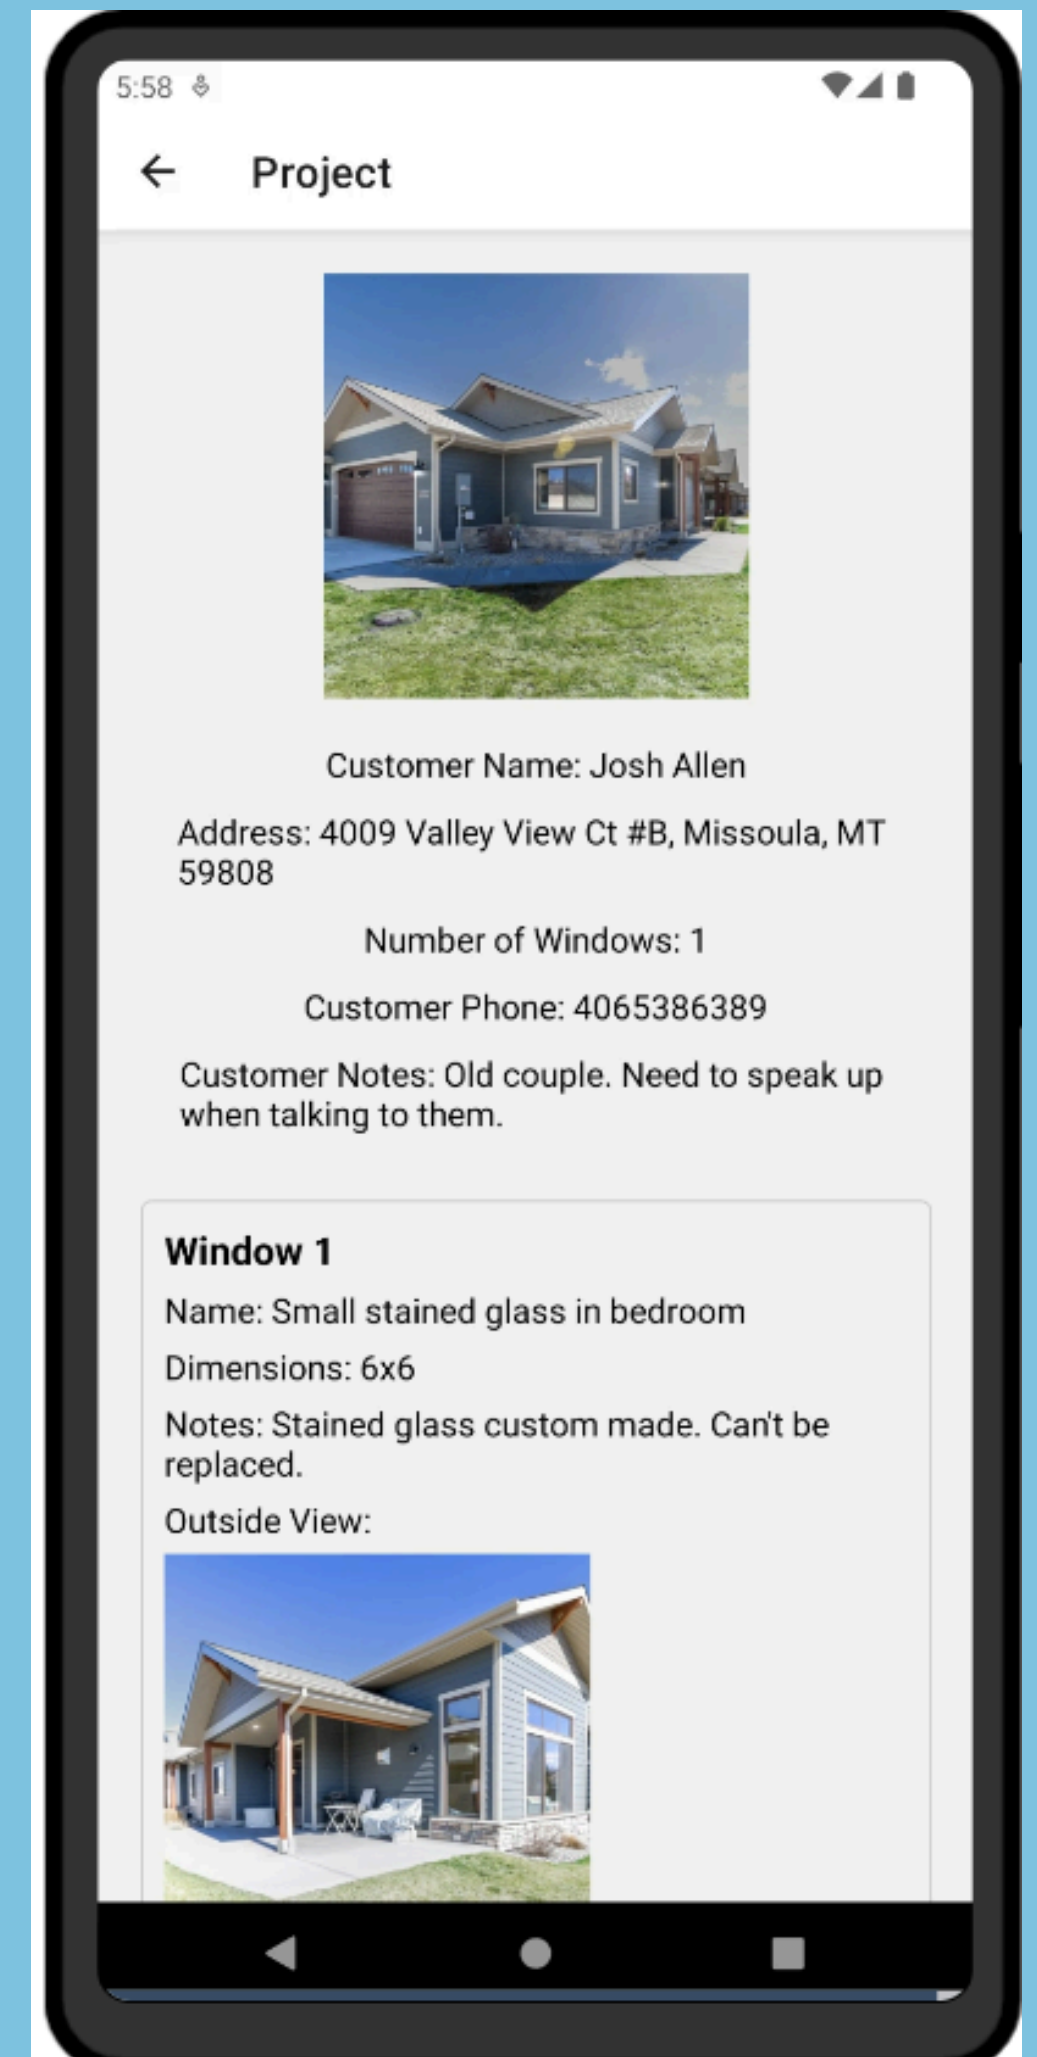

How this app will help Glaziers?

Our app serves as a crucial bridge between estimators and installers in the glazing industry. By consolidating customer notes and information into one accessible platform, we streamline communication and enhance customer service management for installers.

With detailed customer notes readily available, installers can better understand customer preferences and address their needs effectively. Moreover, having photos of windows and comprehensive notes allows installers to plan and prepare efficiently in the shop, ensuring they have the necessary tools and materials for each project.

As a result, installers arrive at customer sites well-prepared and equipped, reducing wasted time spent scouting for basic information. This increased readiness translates to quicker project starts, improved productivity, and ultimately, enhanced customer satisfaction
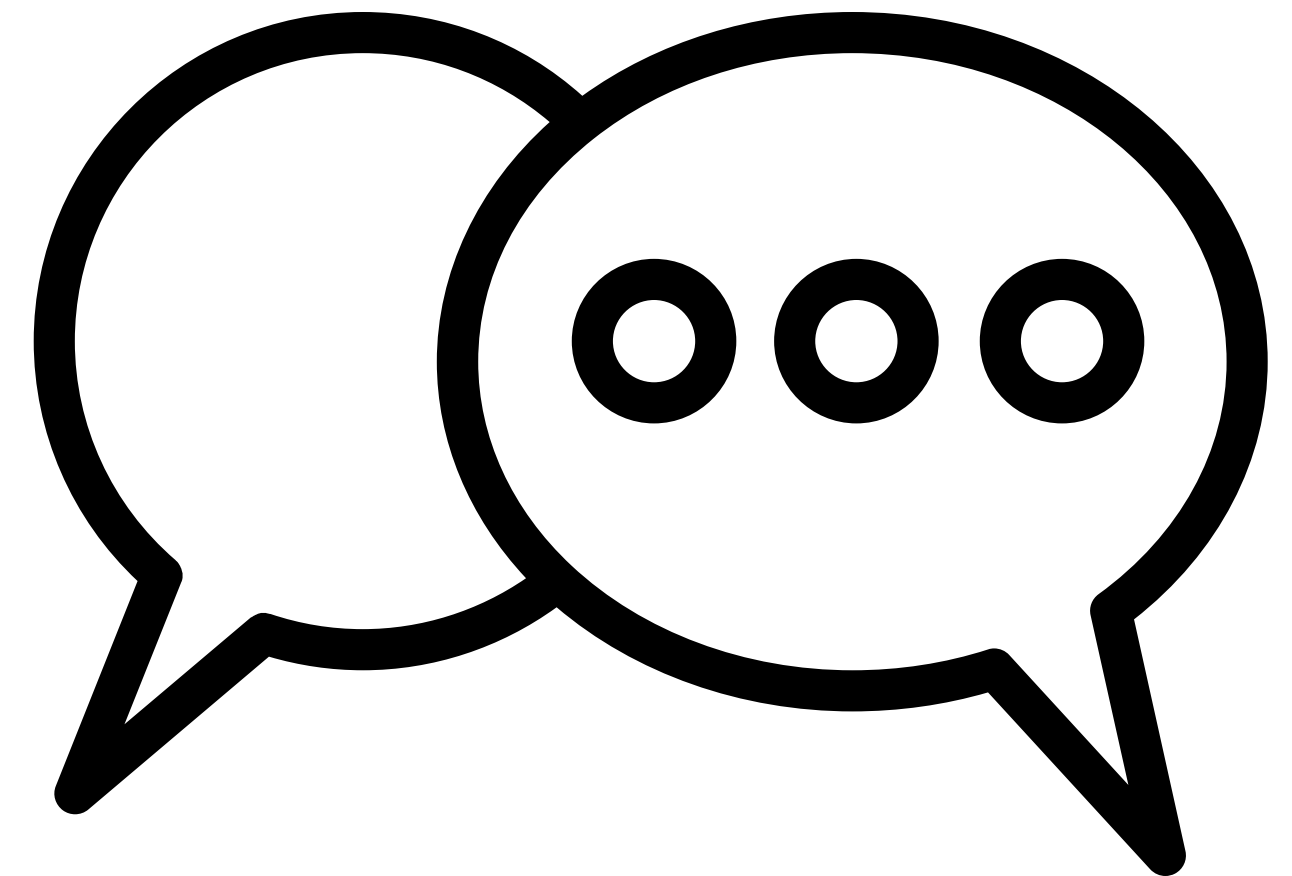

Future work

Company Specific

Our initial step would involve restructuring our collections. This would allow the boss to establish a company and enable installers to register under that specific company, giving them access only to company projects.

Edit and Delete Projects

Our next step is to enable users to edit and delete project posts after submission, providing flexibility to refine content for accuracy. This feature enhances user experience, control, and professionalism.

Simple App Clean-Up

Another important step is to incorporate a "forgot password" page. Additionally, integrate the theme context into every page to allow users to switch between light and dark modes seamlessly.

Pitch to Companies

The final step involves pitching to companies. We will kick off the pitch with Montana Glas and Garden City Paint and Glass in Missoula, MT. Our approach will include requesting regular updates and suggestions for improvement.

Thank you!
